## **DETAILED ACTION**

### ***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, and 4-13, drawn to transmitters and receivers, classified in class 455, subclass 73.
- II. Claims 14-17, drawn to network handshaking, classified in class 709, subclass 237.
- III. Claims 18-29, drawn to a wireless distribution system per se, classified in class 455, subclass 3.01.

Inventions I, II, and III are related as subcombinations as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, such as the function of a transceiver, as classified in class 455, subclass 73. Invention II implements the concept of network handshaking, by virtue of there being a condition fulfilled before communication, which constitutes classification in class 709, subclass 237. Invention III discloses the use of a specific wireless link, which is classified in class 455, subclass 3.01. Each invention may be implemented separately from each other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
